A+ Consulting, Inc.
STAFFING SOLUTIONS

Client Success

A+ Consulting streamlined their recruiting with a seamless transition to SmartSearch.

About A+ Consulting

Since 2002, A+ Consulting has been a prominent provider of staffing services across the United States. Their commitment to delivering top talent is evidenced by their screening and evaluation processes for consultants and permanent placement candidates. Focusing on quality and precision, A+ Consulting ensures that their clients receive unparalleled support in navigating the dynamic demands of the market.

Client Challenge

A+ Consulting faced several challenges with their previous Applicant Tracking Systems, most notably Bullhorn. These platforms were costly, with unsatisfactory customer support and cumbersome interfaces. When considering transitioning to a new system, A+ Consulting was concerned about the learning curve and potential disruption it could cause their operations. Additionally, the team was apprehensive about transferring their database of tens of thousands of records from one system to another. They sought a solution that enabled their team to adapt quickly and minimize downtime, ensuring continuity in their recruitment efforts.

Results

SmartSearch emerged as a transformative solution for A+ Consulting. The platform's intuitive interface and engaged customer support enabled recruiters to transition seamlessly. Access to SmartSearch University and online training resources ensured that A+ Consulting's team had the tools to succeed.

One of the most significant victories was the smooth transfer of A+ Consulting's extensive candidate database. SmartSearch's streamlined implementation ensured the migration occurred faster than anticipated, preventing data loss and operational disruption.

With SmartSearch, A+ Consulting found a reliable partner and experienced a seamless transition that empowered their team to thrive. SmartSearch's commitment to innovation and customer satisfaction continues to drive success for A+ Consulting and their clients alike.
